

## Project: Introduction to Python (2)

# Start our development environment on GitHub Codespaces

Open in GitHub Codespaces

## Package setup

To create a new Python package, you can use package and dependency management tools, such as [Poetry](#) and `poetry init`.

If you work on existing CoLRev packages, you can extend the existing code available in the [internal packages directory](#).

To create a new CoLRev package, navigate to the [internal packages directory](#) and run

```
colrev package --init
```

This command assists you in setting up a new CoLRev package interactively.

More information on package development is available in the [documentation](#).

# Resources

Introductory:

- [Python challenges](#)
- [Python CheatSheet](#)
- [11 tips for Python beginners](#)
- [PEP 8 — the Style Guide for Python Code](#)

More advanced:

- [The Hitchhiker's Guide to Python](#)
- [RealPython Tutorials](#)
- [Python design patterns](#)

Tip:

You can use this [tutorial](#) for more insights in Python

## Next: Best practice and hacking sessions (per group)

- Read the CoLRev-Enhancement Proposal on SearchSources [CEP-002](#), and raise questions in the issue feed (if any)
- Take notes on key challenges and questions (for the best practice session)
- Attend consultation sessions: schedule a session via [Calendly](#)

## We value your feedback and suggestions

We encourage you to share your feedback and suggestions on this slide deck:

[Suggest specific changes by directly modifying the content](https://github.com/digital-work-lab/open-source-project/edit/main/slides/04-python_2w.md)

[Provide feedback by submitting an issue](https://github.com/digital-work-lab/open-source-project/issues/new)

Your feedback plays a crucial role in helping us align with our core goals of **impact in research, teaching, and practice**. By contributing your suggestions, you help us further our commitment to **rigor, openness** and **participation**. Together, we can continuously enhance our work by contributing to **continuous learning** and collaboration across our community.

Visit this [page](https://digital-work-lab.github.io/handbook/docs/10-lab/10_processes/10.01.goals.html) to learn more about our goals:      .
